# Capital City Nissan Of Topeka Service Commitment

## Excellence at every turn... and every straightaway

Our dealership's primary goal is to satisfy every customer at every opportunity. You visit our service department regularly, and we have developed a number of ways to make your visit more comfortable and informative. We know that you want straight answers, and that's the only way we will deliver it to you.

We understand that your knowledge of your vehicle and its necessary repairs is probably not on par with the understanding that your technician has. In order to be sure that his findings and reporting is as clear and concise as possible, we use this Vehicle Information Booklet as a tool to help us communicate your vehicle's condition to you.

Our technicians are the most qualified to work on your vehicle. They have trained extensively, and partake in continuing education regularly to be sure that they are up to date on any changes and improvements handed down from the manufacturer. Our service advisors strive to make your experience with us a pleasant one. They are here to attend to your automotive needs as well as communicate effectively between your technician and you.

Please make yourself comfortable in our waiting area. Watch some TV, use your laptop with our free WI-FI access or just relax and enjoy the quiet. Our courtesy shuttle can take you shopping, to a movie or home if you prefer.

We appreciate your business and will continue to strive for excellence in everything we do for you.

- RR g

# Additional Service Recommendations

In the process of inspecting your vehicle for safety and reliability, your technician **Tyler A** made the following observations and recommends that you do the necessary repairs to resolve these issues.

■ Red: requires immediate attention.

■ Yellow: in need of attention soon.

## Wheel Bearing Replacement - Rear: recommended replace right rear wheel bearing due to excessive noise

### Item Description

Wheel bearings allow each wheel to rotate. They are engineered to bear the weight of the vehicle and allow easy rotation of the wheels by minimizing the friction that goes with metal to metal surface contacts as your car rotates. The functionality of the part is crucial to the overall performance of your vehicle.

### Reason

If not replaced, you will experience premature tire wear and suspension damage.

Wheel Bearing

## Tire Balance and Rotate

### Item Description

Balancing the vehicles tires are necessary to make sure the proper weight of the vehicle is distributed to the proper tire. Tire rotation helps protect tires against uneven wear by moving the tire location on the vehicle. Most tires will exhibit some form of wear based on numerous factors including: wheel alignment, miles driven, driving style and habits, and tire location on the vehicle. By moving or "rotating" the tires as recommended by the vehicle manufacturer, tires may wear more evenly; helping extend the life of the tires.

### Reason

If not properly balanced, a vehicle's tires can experience abnormal wear which can significantly decrease the life of the tire. If not done, you will

experience vibration in the steering wheel at certain highway speeds. Also, vibration will occur in the seat or floorboard at certain highway speeds. Tire wear will become scalloped or cupped.

## Engine Air Filter Replacement

### Item Description

The air filter prevents dirt and debris from entering the engine, which could otherwise cause premature engine wear.

### Reason

If not replaced, poor gas mileage and premature engine wear will result.

Air Filter

**Cabin Filter & In-Cabin Micro Filter: Recommended every 15,000 miles per owners manual. The cabin air filter help keep debris from entering the blower motor and HVAC system causing damage. It also filters out a lot of pollen and dirt to help with allergies. Allowing for a clean, fresh, and healthy air to come into the cabin.**

### Item Description

Your Cabin Filter and In-Cabin Micro Filter should be inspected at each service and replaced every other oil change or after 12 months.

Your cabin and in-cabin micro filter may need replacement if:

- Your heating and cooling system has reduced airflow or there are bad odors or a musty smell
- There are visible signs of dirt, dust or other pollutants

### Reason

The cabin filter / in-cabin microfilter function like your furnace filter at home. They clean the air by

trapping pollen, bacteria, dust and exhaust gases that may find their way into a vehicle's HVAC system. Dirty filters reduce your heating and cooling efficiency

## Front Wipers

### Item Description

Your Wipers should be inspected at each service interval and replaced when indicated.

Indicators shock replacement may be needed are:

- If blades are cracked, become misshapen or lose their flexibility
- If they do not wipe properly

Replacing your wiper blades when recommended enhances safety, increases visibility and reduces the chance of damage to your windshield.

### Reason

## \*Windshield Wiper Blade - (Rear)

### Item Description

Many vehicles are equipped with rear wipers; most commonly, sport utility vehicles, hatchbacks and station wagons. The rear wiper allows the driver to have visibility through the rear window. This is important during bad weather or dirty conditions.

### Reason

The rear windshield wiper will need to be replaced occasionally. When you notice the wiper streaking on the glass or becoming worn, remove it immediately and have it properly replaced.

## Drum Brake - Backing Plate: replace backing plate on passenger rear.

### Wheel bearing is seized and can not be removed from plate

### Item Description

The Drum brake backing plate is a protective plate that protects the drum brake pads and components from outside elements. It also provides an anchor for the brake shoes to keep them from squealing on

the brake drum.

**Reason**

If damaged or not installed, the drum brake system will be exposed to outside elements such as mud and gravel which would prevent the brakes from functioning properly.
