Capital City Nissan Of Topeka Service Commitment

Excellence at every turn... and every straightaway

Our dealership's primary goal is to satisfy every customer at every opportunity. You visit our service department regularly, and we have developed a number of ways to make your visit more comfortable and informative. We know that you want straight answers, and that's the only way we will deliver it to you.

We understand that your knowledge of your vehicle and its necessary repairs is probably not on par with the understanding that your technician has. In order to be sure that his findings and reporting is as clear and concise as possible, we use this Vehicle Information Booklet as a tool to help us communicate your vehicle's condition to you.

Our technicians are the most qualified to work on your vehicle. They have trained extensively, and partake in continuing education regularly to be sure that they are up to date on any changes and improvements handed down from the manufacturer. Our service advisors strive to make your experience with us a pleasant one. They are here to attend to your automotive needs as well as communicate effectively between your technician and you.

Please make yourself comfortable in our waiting area. Watch some TV, use your laptop with our free WI-FI access or just relax and enjoy the quiet. Our courtesy shuttle can take you shopping, to a movie or home if you prefer.

We appreciate your business and will continue to strive for excellence in everything we do for you.

Additional Service Recommendations

In the process of inspecting your vehicle for safety and reliability, your technician **Brayam V** made the following observations and recommends that you do the necessary repairs to resolve these issues.

Red: requires immediate attention.

Yellow: in need of attention soon.

Battery Replacement: recommend battery due to state of health is extremely low and battery does not hold charge

Item Description

The battery, in conjunction with the alternator, supplies power for engine cranking and electrical power needed for the lights, stereo, and all other electrical components.

Reason

If the battery is not replaced periodically, the battery will fail. Also, a defective battery can contribute to starter failure.

Battery

Cabin Filter & In-Cabin Micro Filter

Item Description

Your Cabin Filter and In-Cabin Micro Filter should be inspected at each service and replaced every other oil change or after 12 months.

Your cabin and in-cabin micro filter may need replacement if:

- Your heating and cooling system has reduced airflow or there are bad odors or a musty smell
- There are visible signs of dirt, dust or other pollutants

Reason

The cabin filter / in-cabin microfilter function like your furnace filter at home. They clean the air by trapping pollen, bacteria, dust and exhaust gases that may find their way into a vehicle's HVAC

system. Dirty filters reduce your heating and cooling efficiency

Air Filter

Item Description

Your Air Filter should be inspected at each service interval and replaced every other oil change or after 12 months.

Your air filter may need replacement if:

- There are visible signs of dirt, dust, etc.
- You experience a decrease in MPG

Your air filter traps dust and debris so that it does not get into the intake system and potentially damage the engine. A dirty air filter prevents the necessary volume of clean air from reaching the engine reducing your MPG.

Reason

Front Wipers: wipers are bad and leave streak on windshield

Item Description

Your Wipers should be inspected at each service interval and replaced when indicated.

Indicators shock replacement may be needed are:

- If blades are cracked, become misshapen or lose their flexibility
- If they do not wipe properly

Replacing your wiper blades when recommended enhances safety, increases visibility and reduces the chance of damage to your windshield.

Reason

Brake Rotor Resurface - Front: recommend front rotor resurface due to having bad pulsation at highway breaking speeds and low speeds in town when breaking as well

Item Description

Brake rotors are the parts within the wheels of an automobile which brake pads squeeze in order to slow the rotation of the wheel and bring the vehicle to a stop.

Reason

Resurfacing brake rotors means that damaged material is removed. There is a maximum amount of damaged material that can be removed before the brake rotors are deemed not serviceable and must be replaced. Brake rotors removed from the vehicle are remachined on a lathe. Brake rotors which are in poor condition can cause undo wear to brake pads and calipers.

Brake Rotor

Tire Balance: recommend tire balance due to feel slight shake when driving an missing freights

Item Description

Balancing the vehicles tires are necessary to make sure the proper weight of the vehicle is distributed to the proper tire.

Reason

If not properly balanced, a vehicle's tires can experience abnormal wear which can significantly decrease the life of the tire.

[Other]: passnger rear door seal was hanging off . removed and managed to reinstall as intended and is holding up and no air is coming in when driving
