# Capital City Nissan Of Topeka Service Commitment

### Excellence at every turn... and every straightaway

Our dealership's primary goal is to satisfy every customer at every opportunity. You visit our service department regularly, and we have developed a number of ways to make your visit more comfortable and informative. We know that you want straight answers, and that's the only way we will deliver it to you.

We understand that your knowledge of your vehicle and its necessary repairs is probably not on par with the understanding that your technician has. In order to be sure that his findings and reporting is as clear and concise as possible, we use this Vehicle Information Booklet as a tool to help us communicate your vehicle's condition to you.

Our technicians are the most qualified to work on your vehicle. They have trained extensively, and partake in continuing education regularly to be sure that they are up to date on any changes and improvements handed down from the manufacturer. Our service advisors strive to make your experience with us a pleasant one. They are here to attend to your automotive needs as well as communicate effectively between your technician and you.

Please make yourself comfortable in our waiting area. Watch some TV, use your laptop with our free WI-FI access or just relax and enjoy the quiet. Our courtesy shuttle can take you shopping, to a movie or home if you prefer.

We appreciate your business and will continue to strive for excellence in everything we do for you.

# Additional Service Recommendations

Red: requires immediate attention.

In the process of inspecting your vehicle for safety and reliability, your technician **Quinten N** made the following observations and recommends that you do the necessary repairs to resolve these issues.

Yellow: in need of attention soon.

#### \*Windshield Wiper Blade - (Rear)

#### Item Description

Many vehicles are equipped with rear wipers; most commonly, sport utility vehicles, hatchbacks and station wagons. The rear wiper allows the driver to have visibility through the rear window. This is important during bad weather or dirty conditions.

#### Reason

The rear windshield wiper will need to be replaced occasionally. When you notice the wiper streaking on the glass or becoming worn, remove it immediately and have it properly replaced.

#### Front Wipers

#### Item Description

Your Wipers should be inspected at each service interval and replaced when indicated.

Indicators shock replacement may be needed are:

- If blades are cracked, become misshapen or lose their flexibility
  - If they do not wipe properly

Replacing your wiper blades when recommended enhances safety, increases visibility and reduces the chance of damage to your windshield.

#### Reason

#### Air Filter

#### Item Description

Your Air Filter should be inspected at each service interval and replaced every other oil change or after 12 months.

Your air filter may need replacement if:

- There are visible signs of dirt, dust, etc.
- You experience a decrease in MPG

Your air filter traps dust and debris so that it does not get into the intake system and potentially damage the engine. A dirty air filter prevents the necessary volume of clean air from reaching the engine reducing your MPG.

#### Reason

### Cabin Filter & In-Cabin Micro Filter

#### **Item Description**

Your Cabin Filter and In-Cabin Micro Filter should be inspected at each service and replaced every other oil change or after 12 months.

Your cabin and in-cabin micro filter may need replacement if:

- Your heating and cooling system has reduced airflow or there are bad odors or a musty smell
- There are visible signs of dirt, dust or other pollutants

#### Reason

The cabin filter / in-cabin microfilter function like your furnace filter at home. They clean the air by trapping pollen, bacteria, dust and exhaust gases that may find their way into a vehicle's HVAC system. Dirty filters reduce your heating and cooling efficiency

# Battery Replacement: auxiliary battery needs replacement causing start stop to malfunction

#### **Item Description**

The battery, in conjunction with the alternator, supplies power for engine cranking and electrical power needed for the lights, stereo, and all other electrical components.

#### Reason

If the battery is not replaced periodically, the

Battery

battery will fail. Also, a defective battery can contribute to starter failure.

## Battery Replacement: battery failed test measured 300cca after charge

#### Item Description

The battery, in conjunction with the alternator, supplies power for engine cranking and electrical power needed for the lights, stereo, and all other electrical components.

#### Reason

If the battery is not replaced periodically, the battery will fail. Also, a defective battery can contribute to starter failure.

#### Reason

## Wheel Hub: right front wheel hub grinding

#### Item Description

The Wheel Hub is located between the brake rotors and the axle, on the axle side, it is mounted to the holding bracket from the chassis; on the rotor side, the wheel is mounted to the bolts of the Wheel Hub Assembly.

#### Reason

If the Wheel Hub is found to be damaged or broken the vehicle should not be driven. Since the primary function of the Hub is to attach the wheels to the car it is highly recommended that this part be in perfect working order.
