# Capital City Nissan Of Topeka Service Commitment

## Excellence at every turn... and every straightaway

Our dealership's primary goal is to satisfy every customer at every opportunity. You visit our service department regularly, and we have developed a number of ways to make your visit more comfortable and informative. We know that you want straight answers, and that's the only way we will deliver it to you.

We understand that your knowledge of your vehicle and its necessary repairs is probably not on par with the understanding that your technician has. In order to be sure that his findings and reporting is as clear and concise as possible, we use this Vehicle Information Booklet as a tool to help us communicate your vehicle's condition to you.

Our technicians are the most qualified to work on your vehicle. They have trained extensively, and partake in continuing education regularly to be sure that they are up to date on any changes and improvements handed down from the manufacturer. Our service advisors strive to make your experience with us a pleasant one. They are here to attend to your automotive needs as well as communicate effectively between your technician and you.

Please make yourself comfortable in our waiting area. Watch some TV, use your laptop with our free WI-FI access or just relax and enjoy the quiet. Our courtesy shuttle can take you shopping, to a movie or home if you prefer.

We appreciate your business and will continue to strive for excellence in everything we do for you.

# Additional Service Recommendations

In the process of inspecting your vehicle for safety and reliability, your technician **ryan T** made the following observations and recommends that you do the necessary repairs to resolve these issues.

**Red:** requires immediate attention.

**Yellow:** in need of attention soon.

## **[Other]: AUDIO UNIT VOLUME KNOB REPAIR NEEDS TO BE PERFORMED.**

### **Item Description**

Speak with your service advisor for more information on this recommended service.

### **Reason**

## **Steering Wheel: THE SWITCHS ON THE LEFT SIDE OF THE STEERING WHEEL ARE NOT OPERATING PROPERLY. RECOMMEND REPLACEMENT OF THE STEERING WHEEL SWITCHES.**

### **Item Description**

The steering wheel is the part of the steering system that is manipulated by the driver; the rest of the steering system responds to such driver inputs.

### **Reason**

If the Steering Wheel is found to be damaged or broken the operation of steering the vehicle may be impaired or become unavailable.

## **Brake Rotor Resurface - Front: THE FRONT ROTORS PULSATE WHEN THE BRAKES ARE APPLIED.**

### **Item Description**

Brake rotors are the parts within the wheels of an automobile which brake pads squeeze in order to slow the rotation of the wheel and bring the vehicle

to a stop.

### Reason

Resurfacing brake rotors means that damaged material is removed. There is a maximum amount of damaged material that can be removed before the brake rotors are deemed not serviceable and must be replaced. Brake rotors removed from the vehicle are remachined on a lathe. Brake rotors which are in poor condition can cause undue wear to brake pads and calipers.

Brake Rotor

## Tire Balance: RECOMMEND CHECKING THE BALANCE ON THE TIRES. THERE IS A VIBRATION AT HIGHWAY SPEEDS.

### Item Description

Balancing the vehicles tires are necessary to make sure the proper weight of the vehicle is distributed to the proper tire.

### Reason

If not properly balanced, a vehicle's tires can experience abnormal wear which can significantly decrease the life of the tire.

## Cabin Filter & In-Cabin Micro Filter

### Item Description

Your Cabin Filter and In-Cabin Micro Filter should be inspected at each service and replaced every other oil change or after 12 months.

Your cabin and in-cabin micro filter may need replacement if:

- Your heating and cooling system has reduced airflow or there are bad odors or a musty smell
- There are visible signs of dirt, dust or other pollutants

### Reason

The cabin filter / in-cabin microfilter function like your furnace filter at home. They clean the air by

trapping pollen, bacteria, dust and exhaust gases that may find their way into a vehicle's HVAC system. Dirty filters reduce your heating and cooling efficiency

## Engine Air Filter Replacement

### Item Description

The air filter prevents dirt and debris from entering the engine, which could otherwise cause premature engine wear.

### Reason

If not replaced, poor gas mileage and premature engine wear will result.

Air Filter

## Wiper Blade Replacement: FRONT WIPERS ONLY

### Item Description

The wiper blade is a rubber blade attached to the end of the wiper arm.

### Reason

If not replaced, worn out wiper blades can cause restricted visibility and permanent damage to the windshield.

Windshield Wiper Blade

## "Nissan" - Struts: THE DRIVER'S SIDE FRONT STRUT IS LEAKING BADLY. RECOMMEND REPLACEMENT.

### Item Description

Your Struts should be inspected at each service interval and replaced when indicated.

Indicators shock replacement may be needed are:

- Excessive bounce on rough surfaces
- "Nose-dive" when braking
- Bent, broken, or leaking shock or strut
- Excessive lean or sway in turns
- Uneven or premature tire wear

Replacing your struts when recommended enhances passenger safety and comfort. Struts

play a vital role in stability, handling and reducing stopping distance.

Why buy from a Nissan dealer?

- Nissan tested and approved for proper fit, form and function, installed by a factory trained technician.

- Nissan-backed limited warranty. See your Nissan dealer for complete details of the actual limited warranty

### **Reason**

## **Module Reprogramming: ECM REPROGRAMMING AVAILABLE. RECOMMEND UPDATING TO MOST CURRENT DATA.**

### **Item Description**

Module reprogramming is a service that is found in newer vehicles. As technology increases, cars are made with many computers. A module reprogramming is essentially an update to any one of the vehicles computers.

### **Reason**

If not repaired, the updates for the vehicles computers will not be added. Updates to these computers are necessary for either repair or to keep up with the latest technology offered by the vehicle.
